

ISD Portolan Kft. Tariff Rates Charged for Port Services Provided to Vessels in Public Port Dunaújváros

Valid from 1 February 2007

1. Scope of Tariffs

These tariff rates are payable for the use by vessels of Public Port DUNAFERR (hereinafter referred to as the 'Port') operated by ISD Portolan Kft. and owned by ISD DUNAFERR Zrt, and for the services provided by the Port to vessels.

According to Port Regulations, any vessel/river barge/bark/floating workmachine/floating structures/floating support structures within the Port and between the Port and berths are allowed only when using licensed piloting boxers.

Floating configurations driven by self-propelled transporting units navigating in formations with other unattended cargo vehicles may put in and out of the Port unguided and manoeuvre on their own in the dock basin, subject to appropriate port permit, if the self-propelled unit is also loaded/unloaded in the Port.

If the self-propelled unit is loaded/unloaded in a berthing place outside the Port, only the port pilot may guide the linked vehicle.

These tariff rates and items are applicable unless otherwise agreed. On putting in the Port and using anchorages and other port services, the **ship owner** is obliged, even when failing a written agreement, to pay charges as per these tariff rates in consideration of the port services used.

2. Person Obligated to Pay

The ship owner should pay port dues and **wharfage**. The crew may also designate someone else as a person bearing such costs but the ship owner is liable for the due payment of these charges anyway.

3. Due Date, Default Interest

Charges as per these tariff rates become due before leaving the Port. In the event of harbouring for over 30 days, charges first become due at the end of the month following arrival, and then at the end of each month. Default interest rate is 8%.

4. Currency of Payment of Charges

Charges are to be paid in either EUR or HUF. Any payments made in another currency should be converted using the medium exchange rates of the National Bank of Hungary (MNB) applicable on the due date, save those described in Section 3. MNB medium exchange rates valid as of the last day of the subject month are applicable for invoicing on a monthly basis.

5. Tariff Terms and Conditions

Port dues are to be paid for the period of harbouring in the dock basin (bay) of the Port. The period of time spent by an unattended vessel under the care and control of the Port should serve as the basis for charging dues irrespectively of whether the vessel is anchored in the dock basin or outside (on berth).

Cargo vessels are exempted from the liability for payment of port dues for the period of loading/unloading.

Vessels harbouring in the Port exclusively for the purposes of taking on supplies or for official examinations are exempt, for one day, from the obligation to pay **port dues**.

Loading/unloading operations carried out on a vessel on anchor touching at the wharf or riverside area or moored alongside the wharf in the Port are subject to payment of **wharfage**.

For transhipment of cargo, **wharfage** is charged on the vessel unloaded.

Vessels seeking shelter in the Port should pay **wintering fee**.

The Port Operator charges a **fee for lifting barge lids** where such lids can only be moved using a crane.

The **fee for lifting barge lids** is charged for the ship owner on starting and finishing loading operations, when closing and then reopening of the barge lids are required by weather conditions, as well as in any case where lifting is requested or ordered by the captain, or may become necessary for any activities or work to be carried out on the vessel.

6. Dues and Fees (in EUR, exclusive of VAT)

Port dues

Per burden ton per day for cargo vessels	0.035
Per square metre of occupied water surface per day for any other flotation gear	0.07

7. Ordering Port Services

Please place your orders for services set out in the above tariff schedule with the logistics unit of ISD Portolan Kft. Tel./fax: 06-25/281-705.

Warning! No unauthorized manoeuvres are permitted in the Port area. In addition to payment of applicable tariff rates of the Port, any unauthorized vessel / river barge / bark / floating machine / flotation gear manoeuvres by motorboat have consequences on the manoeuvring party.

8. Miscellaneous

- The Public Port of Dunaújváros is working under a phased double-shift scheme (6 a.m. to 10 p.m. Monday through Friday). The cash desk is open in the same hours.
- Taking over of barges put in berths in the presence of both parties on working days, 6 a.m. to 9 p.m. No barge may be left on berth without prior notice.
- Vessels without driving engine arriving at lie-up berths are to be manoeuvred into the Port or from the Port to berths using boxers licensed by the Port Operator.

Tariff items as per Section 6 **are exclusive of Value Added Tax.**

The Port charges Value Added Tax in accordance with the effective legislation.
